## SUMMARY

---

I am a Software Engineer with hands-on experience in building web-based applications using modern technologies. I specialize in developing responsive, user-focused systems and implementing scalable backend logic. I focus on solving real-world problems through clean, efficient code while continuously improving my technical expertise.

## SKILLS

---

### Frontend:

HTML, CSS, TailwindCSS, JavaScript, ReactJS, NextJS

### Backend:

PHP, Laravel

### Database:

MySQL, SQLite, SQL

### Tools/Others:

Git/Github, WordPress, Figma, Canva

## EXPERIENCE

---

### Web Developer

Feb 2026 - Mei 2026

Zona Instalasi Bandung *Freelance*

- Developed and maintained web-based applications using Laravel and Tailwind CSS to support business needs.
- Built responsive and user-friendly interfaces with a focus on clean design and efficient functionality.
- Implemented backend features, including data handling and system logic, using Laravel framework.
- Collaborated with team members to deliver scalable and maintainable web solutions.
- Gained hands-on experience in real-world development, improving problem-solving and coding skills.

### IT Trainer

Nov 2025

SMP Gondang Legi 1 *Freelance*

- Taught students the fundamentals of website development using HTML, CSS, and basic JavaScript.
- Guided students in creating simple web pages with structured layouts, styling, and basic interactivity.
- Encouraged creativity and problem-solving through hands-on web development sessions.

## PROJECT EXPERIENCE

---

### Bliss UI Website

[Github](#)

- Developed a modern and responsive web interface with a strong focus on user experience and clean design.
- Created visually engaging layouts and optimized responsiveness across multiple screen sizes.
- Implemented efficient and maintainable frontend structure following best development practices.
- Demonstrated strong attention to detail in UI/UX design and usability.

### LaslesVPN UI Website

[Github](#)

- Developed a responsive and visually engaging VPN landing page using HTML and Tailwind CSS.
- Implemented structured layouts with clear visual hierarchy to enhance user experience.
- Built interactive sections such as pricing plans, feature highlights, and global network display.
- Applied modern UI/UX principles to create a clean, consistent, and user-friendly interface.

### Payroll Service Website

[Github](#)

- Built a full-stack payroll management system using Laravel and Tailwind CSS to handle employee salary processes.
- Developed key features including employee management, salary calculations, and automated payroll workflows.
- Designed responsive and intuitive user interfaces to improve usability and user experience.
- Applied MVC architecture and clean coding practices to ensure scalability and maintainability.

### Quotes App Website

[Github](#)

- Developed a web-based application to create, manage, and display quotes using Laravel framework.
- Implemented secure User Authentication and RESTful CRUD operations to manage a dynamic database of quotes.
- Built responsive and user-friendly interfaces using Tailwind CSS.
- Structured the application following MVC architecture for maintainable and scalable development.

## EDUCATION

---

### IDN Boarding School

Jul 2025 - Present

Vocational High School (SMK)

- Major in Software Engineer.
- Focus on practical programming skills, software development, and project-based learning.

## LANGUAGE

---

English - Intermediate

Indonesia - Native
