### PROFESSIONAL SUMMARY

Junior Fullstack Developer with hands-on experience building full-stack web applications using Laravel, MySQL, and TailwindCSS. Developed production-ready systems including a multi-user payroll platform with attendance tracking and automated salary processing, and a content management system for a company profile website. Focused on clean MVC architecture, structured database schemas, and delivering functional, scalable web solutions.

### SKILLS

**Programming Languages:** JavaScript, PHP  
**Front-end Engineering:** HTML, CSS, ReactJS, NextJS, TailwindCSS  
**Back-end Engineering:** Laravel, REST API, Authentication, MVC Architecture  
**Databases:** MySQL, SQLite, SQL  
**Tools:** Git, GitHub, Postman, Figma  
**Deployment:** Vercel, Netlify  
**Spoken Languages:** Indonesian (Native) · English (Intermediate)

### EXPERIENCE

**Web Developer (Freelance) – Zona Instalasi Bandung | Jan 2026 – April 2026**  
Remote, Bandung, Indonesia

Tech Stack: Laravel, TailwindCSS, Blade Templating, MySQL, Figma

- Developed and maintained web-based applications to support business needs.
- Built responsive and user-friendly interfaces with a focus on clean design and efficient functionality.
- Implemented backend features, including data handling and system logic.
- Collaborated with team members to deliver scalable and maintainable web solutions.

### PROJECTS

**Fullstack Developer | Payroll Service Website | [\[GitHub\]](#)**

Tech Stack: Laravel, TailwindCSS, Blade Templating, MySQL

- Built a full-stack payroll management system as a portfolio project to simulate real-world employee salary processes.
- Developed key features including employee management, salary calculations, and automated payroll workflows.
- Designed responsive and intuitive user interfaces to improve usability and user experience.
- Applied MVC architecture and clean coding practices to ensure scalability and maintainability.

## PROJECTS

Frontend Developer | Bliss Website | [\[Live Site\]](#) | [\[GitHub\]](#)

Tech Stack: HTML, CSS, Java Script

- Developed a modern and responsive web interface with a strong focus on user experience and clean design.
- Created visually engaging layouts and optimized responsiveness across multiple screen sizes.
- Implemented efficient and maintainable frontend structure following best development practices.
- Demonstrated strong attention to detail in UI/UX design and usability.

Frontend Developer | LaslesVPN Website | [\[Live Site\]](#) | [\[GitHub\]](#)

Tech Stack: HTML, TailwindCSS, Java Script

- Developed a responsive and visually engaging VPN landing page using HTML and Tailwind CSS.
  - Implemented structured layouts with clear visual hierarchy to enhance user experience.
  - Built interactive sections such as pricing plans, feature highlights, and global network display.
  - Applied modern UI/UX principles to create a clean, consistent, and user-friendly interface.
- 

## EDUCATION

SMK IDN Boarding School

Software Engineering | Jonggol, Indonesia | 2024 - Expected 2027

Leadership & Teaching:

- Led technical workshops for 150+ students across 5+ schools.
  - Developed beginner web development learning materials.
  - Served as Multimedia Staff at the Student Council, handling graphic design, event banners, and event documentation.
-
